## REMARKS

Claims 1-13, 15-17, 21, and 23-26 will be pending in the current Application. Claim 10 has been amended; and claims 18-20 and 27 have been cancelled herein without projudice. Applicants submit that the amendments do not add new matter to the current Application. All the amendments herein have been made in order to clarify the claims and not for prior art reasons. Applicants also submit that (1) no amendment made was related to the statutory requirements of patentability unless expressly stated herein, and (2) no amendment made was for the purpose of narrowing the scope of any claim, unless Applicants have argued herein that such amendment was made to distinguish over a particular reference or combination of references.

Applicants wish to first thank the Examiner for pointing out allowable subject matter. The Examiner has also indicated that claim 27 would be allowable if rewritten in independent form; therefore, in order to further prosecution and not for prior art reasons, Applicants have amended claim 10 to include the elements of claim 27, and have cancelled claim 27. Also, in order to further prosecution and not for prior art reasons, Applicants have cancelled claims 18-20 without prejudice. Therefore, since the Examiner has indicated that the currently pending claims are allowable, Applicants respectfully request a Notice of Allowance.

If a discussion with Applicants' representative would be helpful in addressing any issues of patentability, Applicants respectfully request that the Examiner contact Applicants' attorney using the contact information provided below.

If Applicants have overlooked any additional fees, or if any overpayment has been made, the Commissioner is hereby authorized to credit or debit Deposit Account 503079, Freescale Semiconductor, Inc.

Respectfully submitted,
